Baumann Floats

The Lightest, Fastest Floats on the Market!!

- Main gear tire size = 4.00 x 4 6 ply, Nose tire = 2.80 x 2.50 6 ply.
- Mechanical landing gear retraction and extension. No hydraulic or pneumatic pumps required.
- Shock absorption for nose and mains.
- Constructed from 6061-T6 aluminum, including fittings, struts and skins.
- Consist of seven water tight compartments sealed with 3M 5200caulking.
- Modern bottom skins are fluted and die formed with compound curves, which eliminates cross bracing and makes them stiffer and lighter.
- Storage compartments in each float with the option of two hatches per float.
- Included are dual water rudders, all hardware, struts, spreader bars, steps, cables flying wires, cleats, paddle brackets, paint and non-skid top deck coating. (*Stripe additional*)
- Spreader bars and struts are easily removed from outside the float.
- Float parts are acid dipped, iridited and zinc chromated prior to assembly.
- Fittings, water rudders, cleats and paddle brackets are anodized.
- Riveted using half inch spacing on the top rails and chines to ensure a water tight seal.
- Fluted bottoms ride much smoother in rough water and transmit 15 to 20 percent less loads into your aircraft.
- Other FAA certificated float models manufactured include our:

BF2150A Amphibious float, certified on Husky A-1, A1A & A1B.

BF2550A Amphibious float, certified on Cessna 172A thru S, 175, 175A & Hawk XP.

BF2750A Amphibious float, certified on Maule M5, 6, 7-235, 260 & 420 HP.

BF1500 Certified on the Piper J3, PA-11, Taylorcraft, Legend Cub, Cub Crafters S2 Sport Cub, FK-Light planes FK 9 Mark IV.

BF2100 Certified on Piper PA-12, PA-14, PA-18 and Husky A-1, A1A & A1B

BF2550 Certified on Cessna 172A thru S, 175, 175A, 175B and R172K (Hawk XP).

BF2720 Certified on Maule M5, 6, 7-235 & 260 HP.
